Sign Upgrades Completed in The Villages®  
Community

Sumter County, FL -

The Sumter County Public Works Department completed a four-year sign upgrade throughout the unincorporated sections of The Villages® development starting in District 1 and finishing in District 10.

The improvements included the replacement of decorative signposts to accommodate stacking the road signs for improved visual navigation. The street signs were also upgraded to meet the recent guidelines for age-restricted communities changing the appearance of the street names by making the first letter of every word capital with the remaining letters lower case and increasing the font size as well as increased reflectivity.

Commissioner Al Butler noted that this roughly \$500,000 expenditure “improved safety in the community by making the signs more visible in daylight and at night, which helps both residents and visitors to better navigate our streets.”
