Water Service Line Replacement Program

In our continued commitment to improve the quality of life and maintain the utility infrastructure within The Villages, The Village Center Community Development District has initiated a Water Service Line Replacement Program in the Villages Center Service Area (VCSA).

The potable water system in VCSA is aging and the purpose of the project is to replace service lines, significantly reducing the future potential for leaks. Water service lines bringing water from the water main to household water meters will be replaced as part of this project. During construction, water outages may occur at different times, depending on which area workers are concentrating on. No residents will be without water service during overnight hours. This upgrade to the water system will enhance reliability and service.

Beginning May 27th, 2025, District Contractor, RCM Utilities, LLC., will begin replacing the water service connections in Villa de la Mesa in District 1 of The Villages, along Dominguez Dr., Delgado Ave., and Ramirez Ave. The project is expected to take 8 weeks.

During construction, homeowner's water service will be off for no more than eight hours. Homeowners will be given 24-hour notice of when their service will be impacted by way of a door hanger placed on their door. If required, boil water notices will be sent to residents which will be in effect for a 2-day testing period. The safety of our residents and construction personnel is of utmost importance. We ask that everyone abide by all barricades and warning signs to avoid the active construction areas for anything other than access to your property.

For more information, please contact the Utilities Department by [email](#) or at 352-753-4508.
