Payments Made Payable to WUDD – SSU and/or WUDD - SEWWCA

Terms

I agree to be fully bound by the applicable provisions of the rules of South Sumter Utility and Southeast Wildwood Water Conservation Authority, as applicable regarding Water, Sewer, and Irrigation User Rates, Fees and Charges, and Operating Policies and Procedures for Water, Sewer, and Irrigation utilities for the property referenced above, located within the boundaries of the utility's service area. It is further understood and agreed that the sale of water to Customer occurs at the meter, and SSU and SEWWCA have no responsibility related to service or supplying water after said water passes through the Utility supplied meter. Customers are advised not to tamper with meter, including turn on/off of water service which is prohibited. The person executing this application states he/she is duly authorized to execute this agreement on behalf of Customer. Customer agrees to indemnify SSU and SEWWCA for damages SSU and SEWWCA may incur because of false representation in this application, and Customer agrees to release and hold WUDD harmless from all damage resulting from any failure or inability to provide service. It shall be the obligation of the Customer to notify the SSU and SEWWCA of change of occupancy, or other circumstances for which termination or transfer of service is requested, and Customer shall be responsible for all service charges incurred to the date upon which written or personal notification is received by SSU and SEWWCA.

CROSS-CONNECTION CONTROL PROGRAM

Dear Utility Customer,

The Potable water supplied to your facility is provided by a water system owned by Wildwood Utility Dependent District (WUDD). A critical element to operating a potable water system is to ensure the protection of the health and safety of the water supplied. One of the ways that this is achieved is by requiring that a Backflow Prevention Assembly be installed at all service connections. A Backflow Prevention Assembly is typically either a Double Check (DC) or Reduced Pressure Assembly (RP) and is located on the customer side of the water meter. Backflow Prevention Assemblies are installed on water service lines to all commercial buildings, irrigation, and fire line services. This is further explained in the Cross-Connection Control Program Handbook that was created by WUDD in compliance with the rules of the Florida Department of Environmental Protection (FDEP). The Cross-Connection Control Program Handbook outlines the requirements of the customer, which includes installation and annual testing and maintenance on all Backflow Prevention Assemblies. A copy of the Cross-Connection Control Handbook can be downloaded on our website at www.DistrictGov.org by selecting the following: Services – Utilities and Sanitation – Commercial Customers – and then under the heading Cross-Connection, select WUDD.

COMMONLY ASKED QUESTIONS REGARDING CROSS-CONNECTION AND BACKFLOW

What is a cross-connection?

A cross-connection is a point in a plumbing system where the potable water supply is connected to a non-potable source.

Where might cross-connections be found?

They can be found in all plumbing systems in areas such as:

- Wash Basins and Service Sinks
- Hose Bibs
- Irrigation sprinkler Systems
- Photo Developing Equipment
- Medical and Dental Equipment
- Fire Sprinkler Systems

What is backflow?

It is the unwanted flow of non-potable or contaminated fluids back into the customer's plumbing system and/or the public water system. There are two types of backflow, see below:

- o Backsiphonage- caused by a negative pressure in the supply line to a facility or plumbing fixture.
- o Backpressure- can occur when the potable water supply is connected to another system operated at a higher pressure or has the ability to create pressure. Primary causes are booster pumps, pressure vessels, elevated plumbing, etc.

What is a cross-connection control program?

It is a program required by the FDEP to detect and prevent possible sources of non-potable water or contaminants from entering the public water supply.

Why do backflow assemblies need to be tested every year?

The backflow assembly is a mechanical device that needs maintenance just as a vehicle does. The annual test indicates if the internal check valves and mechanics are working properly. Annual testing and maintenance, if necessary, is also required by FDEP and WUDD.

<u>QUESTIONS</u>	<u>YES</u>	<u>NO</u>
1. Is there another source of water to the property other than the service connection to the public potable supply i.e., a private well, lake, stream, river, pond, etc.?	()	()
2. Is there an irrigation system on the property?	()	()
3. Are there any facilities (such as a booster pump, pressure tank, etc.) that increase the water pressure to the facility or any portion thereof, above the supply pressure presently provided by the potable supply?	()	()
4. Are any chemicals used in the operation?	()	()
5. Are any chemicals stored at the facility?	()	()
6. Are any ejectors, aspirators, or pumps used in the operation?	()	()
7. Is any water recycled during the operation of an air conditioner or other equipment in your plant or building?	()	()
8. Are there any water supply lines submerged in tanks, vats, etc.?	()	()
9. Is there a fire stand-pipe or fire sprinkler system installed in the building?	()	()

PROVIDE APPROPRIATE DETAILS ON ALL QUESTIONS ANSWERED "YES".
ATTACH ADDITIONAL SHEETS AS
NECESSARY:

Acknowledgement: Details regarding the Cross Connection Control Program are contained in a handbook that has been adopted by WUDD. By my signature below, I acknowledge that WUDD has made the Cross Connection Control Program Handbook available to me by logging on to www.DistrictGov.org and then selecting the following: Services – Utilities and Sanitation - Commercial Customers - and then under the heading Cross-Connection Control, select WUDD. I further agree to be bound by the conditions and guidelines included therein. I also acknowledge that the information that I have provided is correct to the best of my knowledge and may result in the requirement of additional actions. Such actions may include, but are not limited to, installation of or modification of a backflow prevention assembly. Any action, if required, will be the responsibility of the customer or facility owner, as appropriate. Actions shall be completed within 30 days of receipt of notification by WUDD or its designated agent.

FATS, OILS, AND GREASE REMOVAL DEVICE PROGRAM REGISTRATION FORM

Utility Account #:		Date:	
Facility Name:			
Facility Address:			
Contact Name:			
Phone #:		Alternate #:	
Mailing Address (if different from above):			
Please Initial ONLY if your facility DOES NOT generate Fats, Oils, and Grease as described in the Fats, Oils, and Grease Handbook. PLEASE NOTE, YOU ARE STILL REQUIRED TO SIGN PAGE 2 OF THIS FORM.			
		Initial Here	
Seating Capacity (if applicable):	0-50:	51-100:	101-250:
			Over 250:

1. Choose the description that best describes your facility type:							
Fast Food Restaurant		Hospital		Caterer			
Full Service Restaurant		Nursing Home		Other			
Drive Thru Restaurant		Club/Organization		If other please describe:			
Coffee Shop		Office					
Bakery		Auto Repair					
Supermarket		Car Wash					
2. Check each day your business is open:							
Monday:		Tuesday:		Wednesday:		Thursday:	
Friday:		Saturday:		Sunday:			
3. Check the meals that are served at your facility (if applicable):							
Breakfast:		Lunch:		Dinner:		Snack/Coffee:	
				Food Prep Only:			
4. Does this business have a grease removal device? Yes: No: If no, go to question # 6							
5. Complete the following for EACH grease removal device at your business (If more than 1 device exists at your business, use additional sheets as necessary):							
FOG Removal Device Information							
Indoor or Outdoor:				Size (gallons):			
Location (i.e., under 3-bay sink, in-ground, etc.):							
Manufacturer:				How often is it cleaned/pumped:			
How is the grease disposed of:				Other (describe)			
If a contractor or pumper is utilized for cleaning and / or pumping, please complete the following:							
Company Name:				Phone Number:			
Address:							

6. Choose each of the items listed below that are present in your facility:						
Fryer		If yes, how many		Grill		If yes, how many
Oven		If yes, how many		Tilt Kettle		If yes, how many
3-Bay Pot Sink		If yes, how many		2-Bay Pot Sink		If yes, how many
Single Bay Pot Sink		If yes, how many		Pre-Rinse Sink		If yes, how many
Dishwasher		If yes, how many		Mop Sink		If yes, how many
Wok Station		If yes, how many		Other		If yes, how many
If you selected other, please describe:						
7. If your facility has grills/ovens which type of exhaust cleaning system do you use to clean the filters:						
Automatic cleaning system:				Manual cleaning system:		
8. If you manually clean hood filters, where are they cleaned:				Onsite		Offsite (by a contractor)
9. If cleaning hood filter on-site, describe process in detail (i.e., 2-bay sink, dishwasher, etc.):						
10. If waste fats, oils, and grease are stored on the premises, where is the material stored:						
11. Do you use additives associated with your grease containment device, floor drains, sewer lines, etc. to help clean them:				Yes		No
12. If you answered yes to question # 11, please describe the type (i.e., enzyme, bacteria, chemical, etc.):						
13. If you answered yes to question # 11, please describe where it is used (i.e., Floor drain, sewer line, etc.):						

By signing below you acknowledge that the information that is provided herein is factual to the best of your knowledge. You also acknowledge that you have read and understand the Grease Management Program Handbook that is available to download at www.DistrictGov.org. You are also aware that you must notify the Utility Customer Service Department within 30 days if any of the information provided on this Registration Form changes. Questions regarding the program and its requirements should be directed to the Utility Customer Service Department at (352) 750-0000.
