STORMWATER MANAGEMENT IRRIGATION ACTIVITY

The Villages community and surrounding areas of central Florida are currently under Phase III Modified Water Shortage Orders issued by the Southwest Florida Water Management District and St. Johns River Water Management District due to prolonged lack of rainfall. In response, our community has reduced irrigation to one day per week and limited new plantings wherever feasible.

Recent localized rainfall in Districts 1 and 2, totaling up to 6.5 inches in some areas, has significantly increased water levels in select stormwater basins. These engineered basins capture and retain rainwater for landscape irrigation, reducing our reliance on groundwater. However, some affected basins have reached levels that limit their capacity to safely manage additional rainfall.

To restore capacity, roadway irrigation systems on District-owned property will be used to pump down affected basins. This targeted, monitored irrigation is limited to areas experiencing localized heavy rainfall and does not change current water shortage restrictions or indicate an improvement in broader drought conditions.

Affected areas include:

- District 1: Areas along Morse Boulevard
- District 2: Areas along El Camino Real

Residents may notice roadway irrigation along Morse Boulevard and El Camino Real, as well as surrounding golf courses, outside normal hours. These targeted irrigation events are necessary to manage localized basin levels while maintaining compliance with current water shortage orders.

PET PREPAREDNESS

When disaster strikes, time is of the essence. While many families prepare by gathering food, water, important documents, and medications, it's important not to overlook a vital member of the family: your pets!

Just as you build an emergency kit for yourself, be sure to prepare one for your pets. Include several days of food and water, medications, a carrier or leash, bowls, waste bags, and familiar comfort items. Keep copies of vaccination records and medical information readily available.

Planning ahead can make all the difference. Identify pet-friendly shelters or accommodations, and make arrangements with friends or family who may be able to care for your pets in an emergency. Make sure your pets have current identification and that you have a safe way to transport them.

By including your pets in your emergency planning, you can help keep every member of your family safe and prepared.

WATER SERVICE LINE REPLACEMENT PROGRAM

In our continued commitment to improving the quality of life and maintaining the utility infrastructure within The Villages, the Village Center Community Development District has initiated a Water Service Line Replacement Program in the Villages Center Service Area (VCSA).

The potable water system in the VCSA is aging, and the purpose of this project is to replace service lines, significantly reducing the potential for future leaks. Water service lines that bring water from the water main to household water meters will be replaced as part of this project.

During construction, water outages may occur at different times, depending on which area workers are concentrating on. No resident will be without water service during overnight hours. This upgrade to the water system will enhance reliability and service.

Beginning October 19, 2026, the District's contractor, RCM Utilities, LLC, will begin replacing water service connections in Villa De La Vista South. The service line replacements are expected to take eight weeks, followed by landscape restoration.

During construction, homeowners' water service will be off for no more than eight hours. Homeowners will receive 24-hour notice of when their service will be impacted via a door hanger placed on their door.

If required, boil water notices will be sent to residents and will remain in effect for a two-day testing period.

The safety of our residents and construction personnel is of utmost importance. We ask that everyone abide by all barricades and warning signs and avoid active construction areas except when accessing your property.
